

PENTAGON

- Why were FBI agents immediately confiscating all video evidence of the impact around the Pentagon within moments of the attack and why have we not seen any of these videos except for 5 grainy frames from a security camera?
- Why does an analysis of Flight 77's Flight Data Recorder show the plane at 480 feet adjusted altitude a second before impact when it supposedly hit and knocked down five light poles?
- If Hani Hanjour was incompetent at flying a single engine prop-plane, then how are we to believe he maneuvered a commercial airliner - making a 270° turn at 400 mph all while dropping 7,000 feet in two minutes - and hit the Pentagon inches above lawn? Many experienced pilots say with luck it would take several tries to accomplish such a feat.

The 9-11 Commission Report states that the flight path taken by Flight 77 was on the South side of the Citgo station. This directly contradicts the flight path from the Flight Data Recorder that was released by the NTSB. This data clearly shows that the path of the plane was not only on the North side of the Citgo station, but was no where near the light poles that were allegedly hit and knocked down by Flight 77.

THE 76-PAGE MOTIVE

- The Project For A New American Century, a neo-con think tank, wrote a paper in September 2000, titled Rebuilding America's Defenses where they stated that their goals of total US Military dominance would take a long time to achieve, "absent some catastrophic and cataclysmic event - like a new Pearl Harbor." One year later they got their event.

HOW COME?

- In the event of a hijacking, all airline pilots are trained to key an emergency four-digit code into their plane's transponder. This would surreptitiously alert air traffic controllers, causing the letters "HJCK" to appear on their screens. How is it not one of the four pilots entered this code?
- Construction Steel has an extreme high melting point of 2800°F and NIST reported that the fires only got to a max temp of 1800°F for 15 minutes. Why did firefighters describe a "foundry" of molten steel at Ground Zero?
- With a simple shove of the yoke down, anyone not buckled in would be slammed to the roof of the plane and a simple pull back on the yoke would slam them to the floor disabling any hijacker. How are we to believe no pilot thought to do this, and instead turned over their plane?

OF COURSE IT'S ALL JUST COINCIDENCE

- On September 10th, 2001 Donald Rumsfeld announced that the Pentagon had 2.3 trillion dollars of undocumented adjusts, meaning the money is missing.
- The accountants responsible for tracking down the missing money happened to be in the section of the Pentagon that was destroyed, thus killing them along with their investigation.
- The White House claims that the idea that planes would be used as weapons was never considered, however: On September 11th, 1994 Frank Corder crashed a single-engine Cessna onto the lawn of the White House, two stories below the presidential bedroom; In 1995 a plan named Operation Bojinka was discovered where terrorists planned to hijack planes and detonate bombs over US cities; and during the G8 Summit in 2001, attended by President Bush, the airport in Genoa was closed and surface-to-air missiles were positioned.
- Thousands of American and British troops were massed on the borders of Tajikistan, Uzbekistan, and Pakistan as well as other countries, along with carrier task forces - all while President Bush had the launch order to attack Afghanistan on his desk the day before 9-11.
- 6 weeks before 9-11-01 Larry Silverstein purchased the WTC complex including an insurance policy that specifies coverage against a terrorist attack.
- The company in charge of security at the WTC was called Stratesec, which includes Marvin Bush, the president's brother, as a principal owner. It was also involved in providing security for United Airlines and Dulles Airport (where flight 77 took off from).
- For many years the military commanders in charge of interceptors had the authority to order a shoot-down on their own. Just months before 9/11, these orders were changed so that any such order must now be approved by the Secretary of Defense directly.
- And yes of course, it's all just bureaucratic incompetence. Billions upon billions of dollars in defense and yet the systems to defend such an attack were not in place. We are told there was nothing that could have been done to prevent the attacks. The answer then must be: GIVE MORE MONEY TO DEFENSE. It's funny how incompetence seems to get rewarded with bigger budgets!

WHY YOU SHOULD DEMAND A NEW 911 INVESTIGATION!

- WTC Building 7, a 47 story tall skyscraper was the 3rd building to collapse that day. Why was it not investigated by the 9-11 Commission?
- Is it coincidence that a military simulation of hijacked planes flying into buildings was taking place on the morning of 9/11?
- Why does the data recorder of Flight 77 show a flight path in a different place than the one released by the 911 Commission?
- BBC & CNN began reporting WTC 7 had collapsed almost a half-hour before it did? How did they know this and who told them?
- The head of Pakistani Intelligence transferred \$100K to Mohammed Atta but was not investigated, why?
- Why have the 80 + videos outside the Pentagon never been released?
- Why has it never been explained what caused so much steel to turn into molten metal at the WTC site?
- What force pulverized most of the concrete and office material of the Towers into dust, then ejected steel beams into the air?
- Why is it now unpatriotic to ask questions?

WTC BUILDING 7

At 5:20PM the 47 story steel framed building collapsed vertically, falling in 6.5 seconds into a pile only 7 stories tall, much like a controlled demolition.

Structural damage on the south side facing the towers, if the only cause of collapse, would have toppled the building over. Photos of the other 3 sides of the building show little fire or damage.

Symmetrical collapse would require all 58 perimeter columns and 25 core columns to be cut at precisely the same time. Professionals require computer-controlled detonators to achieve this precision.

1200°F temperatures were measured by NASA aircraft in the rubble days after 9/11. How can office furniture and carpet burn so hot inside an oxygen starved rubble pile?

BBC and CNN reported that WTC 7 had collapsed 20 minutes and 1 hour (respectively) before it actually had collapsed, how would they know this when no steel framed building has ever collapsed due to fire in history prior to 9-11? What officials told them and why is this not in the report?

Fire and Police personnel were warned to get people back because the building was about to collapse or “blow up”, as one police officer can be heard saying to a CNN reporter. What officials made this determination, and how?

Building 7, or the Solomon Brothers Building, contained numerous government offices, including the CIA, FBI, FEMA, and some offices of the SEC commission. Many files relating to the Enron and MCI WorldCom investigations were lost in the collapse.

Mayor Giuliani's emergency command bunker was installed on the 20th floor of this building due to its structural integrity. It was a heavily reinforced and self contained section of the building that would make a total collapse even more unlikely.

“We built in enough redundancy to allow entire portions of floors to be removed without affecting the building's structural integrity, on the assumption that someone might need double-height floors,” said Larry Silverstein, president of the company that owned WTC7 in 1989.

Look at the chunk sliced from WTC 3 (image right) yet this building did not collapse.

There is still no official report explaining the collapse of WTC 7. It is however pending.

SHOW ME THE MONEY

Pakistani ISI Agent, Saeed Sheik, wired \$100,000 on September 10th to Mohammed Atta at the instruction of Mahmoud Ahmad, the head of the ISI. Why is the head of Pakistani intelligence, our supposed ally in the war on terror, sending \$100,000 to a known terrorist?

Interestingly enough Mahmoud Ahmad was also in Washington meeting with the future head of the CIA, George Tenet on the morning of 9-11. This was not investigated by the 9-11 Commission.

The week leading up to 9-11 an extremely high number of PUT options were placed specifically on American Airlines and United Airlines indicating someone knew those stocks would decrease in value. American Airlines experienced 4 times and United Airlines 25 times above normal option trading on September 6th, 2001. The firm used to place some of the PUT options was chaired by the number three Executive Director of the CIA, A.B. “Buzzy” Krongard.

THE COLLAPSE OF THE TWIN TOWERS

The 10,000+ page NIST report admits that all of the jet fuel burned off within 15 minutes. The remaining fires were fueled by office furniture and wallboards. It also admits that only the “worst case estimate” in their simulation resulted in any collapse.

Why does the NIST report not explain what caused the rest of the towers to peel apart after the top started to collapse? They just refer to it as “global collapse” with no explanation how that occurred in the undamaged sections.

Why was not a desk, computer, phone, chair, stapler, or anything from the inside of an office, found in the debris of the towers? A gravitational collapse may crush this material but it would still be there. This is not the case with the collapse of the twin towers.

Steel beams were ejected over 400 feet away. Where did the energy come from to do this? Some were embedded into the side of nearby buildings, like spears.

What caused most of the 425,000 cubic yards of concrete to get pulverized into dust? Gravity alone cannot explain the degree to which it was pulverized.

If the heat caused the trusses to sag and pull the perimeter columns in, thus initiating a pancake collapse, why were the 47 core columns not left standing as the floors pancaked around them like a spindle on a record player? The NIST computer simulation even shows these beams remaining in a video, with no explanation as to how they collapsed.

What could explain the bending of this giant steel column? Where did the heat-source come from to bend this without fracturing or cracking it? It takes 1000's of degrees to bend steel like this without any buckling or tearing on the tension side.

MILITARY DRILLS AND AIR DEFENSE FAILURES

Over 12 different military exercises were happening on that fateful day. Some involved simulations of airliners crashing into WTC and other targets.

Operation Tripod III was simulating a bio-attack on NYC and had FEMA pre-positioned in the city on 9/10.

Air traffic controllers and NORAD were confused as to which of the many false radar blips were real, and which were part of the drill. They can be heard asking, “Is this real world or exercise?”. How could Al Qaeda know drills would be run that day to confuse the ATC?

Why were the tapes of the communication between ATC and the pilots/hijackers destroyed by the FAA?

Why was standard operating procedure not followed that when a plane goes off course or radio contact is lost, jet fighters are immediately scrambled to visually check on the plane and its pilots?

BUT SOMEONE WOULD HAVE TALKED?

Secretary of Transportation Norman Mineta testified before the 9-11 Commission that he was in the Presidential Emergency Operating Center with Vice President Cheney as American Airlines flight 77 approached the Pentagon when,

“...a young man who had come in and said to the vice president, 'The plane is 50 miles out. The plane is 30 miles out.' And when it got down to, 'The plane is 10 miles out,' the young man also said to the vice president, 'Do the orders still stand?' And the vice president turned and whipped his neck around and said, 'Of course the orders still stand. Have you heard anything to the contrary?'”

What orders were Cheney giving and was this a direct stand down order?

FBI counsel Colleen Rowley detailed how bureau higher-ups thwarted attempts to investigate accused 20th hijacker Zacarias Moussaoui prior to 9-11, whose laptop then just happened to contain evidence linked to 9-11.

FBI agent Robert Wright wrote a 500 page manuscript, “Fatal Betrayals of the Intelligence Mission”, in which he details how FBI bureaucrats “intentionally and repeatedly thwarted his attempts to launch a more comprehensive investigation to identify and neutralize terrorists.” his book has been illegally blocked by the FBI to be released.

Sibel Edmonds, A former translator for the FBI with top-secret security clearance, said she spent more than three hours in a closed session with the commission's investigators providing information that was circulating within the FBI in the spring and summer of 2001 suggesting that an attack using aircraft was just months away and the terrorists were in place. The Bush administration, meanwhile, has sought to silence her and has obtained a gagging order from a court by citing the rarely used “state secrets privilege”.
